Clover Health is a healthcare technology company offering Medicare Advantage plans.

We created and developed Clover Assistant to help inform primary care physicians' treatment decisions at the point of care and to help deliver optimal clinical results for your patients our members. Moreover, doctors who take advantage of The Clover Assistant are paid double the Medicare rate per visit every visit within five days.

How does it work?

Built on Clover Health's Data Platform, Clover Assistant aggregates and integrates each individual's health data from across the healthcare ecosystem. That includes lab results, specialist visits, medication adherence, claims, and customer experience encounters. Every insight or recommendation is actionable and customized to each individual patient.

Clover assistant is a free, web-based application. After a basic login, you'll be able to see a list of your patients and their personalized assessments prepared for your visit. Completing a visit is simple—Clover Assistant surfaces recommendations based on each patient's individual needs and takes no more than three to five minutes to complete. The recommendations are prioritized using Clover's advanced machine learning technology and take into account a comprehensive view of interactions your patient has across the healthcare continuum.

Once you're done, getting paid and submitting the assessment is an easy two-step process. Simply download a copy for your personal records or fax a copy to your EHR, then upload or fax Clover a copy as well.

How is this useful for you?

For example, meet Miss Gonzalez she was recently in the emergency room for a diabetic foot ulcer and she forgot to tell you. Through the Clover Assistant, you will see the emergency room visit occurred, what diagnosis was made, review any medication prescribed and receive confirmation that Miss Gonzales filled her scrip.

Using Clover Assistant ensures your time with patients is as impactful as possible by offering holistic insight into their health history.
